

# Saul Wildlife Sanctuary Annual Fall Stewardship Day

Sponsored by the Rose Valley Environmental Advisory Council (EAC)

JOIN US: LEARN • PULL • MAKE A DIFFERENCE

---

**When:** **Saturday, October 15 (Rain Date: October 22)**

9:00 a.m. - 12:00 p.m.

**Who:** **You and fellow nature enthusiasts**

(Free and open to the public - bring a friend!)

**What:** **Land Stewardship:** Paving the way for biodiversity in our community by removing exotic invasive vegetation

**Where:** **The Saul Wildlife Sanctuary**

Park behind the Old Mill: 9 Old Mill Lane, Rose Valley

---

Learn how to get rid of English ivy, multiflora rose, goutweed, sapphire berry, Japanese knotweed and burningbush on your own property and make way for forest wildflowers, native shrubs and the next generation of trees.

Invasive plants cause great harm to native biodiversity and wildlife habitat. In this hands-on workshop led by Dr. Roger Latham, nationally recognized leader in conservation biology, EAC members will teach participants how to identify native versus invasive plants and will present the best methods and times for invasive removal.

As part of the workshop, participants will practice their new knowledge and help enhance the ecologic health of our community by removing invasives from the Saul Wildlife Sanctuary. **Bring gloves, wear sturdy shoes and long sleeves - clothes you don't mind getting dirty.** We look forward to seeing you there!
